PROGRAM DESCRIPTION

P.A.P.P.S is a parental engagement program initiative that is unique. This program is a combination of peer recovery mentoring, educational facilitation, resource development, supportive services and coaching development all wrapped into one.

We utilize an evidence based curriculum paired with a practical facilitation for the program. A scope and sequence mentor based guide designed to assist parents of children who are simultaneously undergoing a youth development mentoring program. With the goal of enhancement to the entire family, P.A.P.P.S is not only clinically based, but peer supported.

Studies show that individuals are more willing to open up and receive with their peers rather than with a professional with no personal experience to their situation.

Created to enhance an entire family, P.A.P.P.S is a supportive function of an emotionally, mentally financially and economically home that is self-sustainable and safe.
